- Flutter
- API Integration
- Firebase
- Provider
- Google Map Api
- SDK Integration

- Dart
- IOS Deployment
- Push Notification (FCM)
- State Management
- Unit & Integration Testing
- Git & GitHub

- Java
- Android Deployment
- GetX
- Payment Gateway
- SQFLite Database
- Postman

PROJECTS

- **IndoCraft World (IOS & Android)**
  Developed a full-featured ecommerce app with product browsing, cart, checkout, order tracking, and secure payment integration using Flutter and REST APIs.

- **Astute RMS And Ecare (IOS & Android)**
  Developed a full HRMS app with attendance, leave management, payroll access, and employee self-service modules, along with integrated push notifications using Flutter and REST APIs.

- **Cost Mitra (IOS & Android)**

Developed an expense management app enabling users to add, track, categorize, and manage daily expenses, along with generating downloadable PDF reports using Flutter.

- **Abbstem Clan (IOS & Android)**
  Developed an ERP application with modules for inventory, orders, workflow tracking, and reporting, built using Flutter and REST APIs to streamline business operations.

- **Starline Express (Android)**
  Built an LMS application enabling users to manage logistics data, track shipments, update delivery statuses, and streamline workflow processes using Flutter and REST APIs.

- **Karbi Tea (IOS & Android)**
  Developed a tea processing application with modules for cultivation, fine leaf, steaming, drying, and aggregation, featuring robust offline data saving with automatic sync to the server when internet reconnects using Flutter and REST APIs.

- **Lifenity Rider And Customer**
  Built a logistics app with Google Maps integration for live tracking, Firebase push notifications, and a workflow supporting multiple pickups, deliveries, and complete order entry management using Flutter and REST APIs.
